

Diane Moellenhoff

Area 4 Director

Software Sales Manager, The Integra Group

I currently lead a software consulting team that works with prospects and clients to enhance and develop tailored technology solutions for their respective industries.

Prior to moving to St. Louis to work for Integra, I spent almost 20 years on the West Coast with a varied career in technology working for Microsoft, Texas Instruments and other semiconductor companies in sales, consulting and business analyst roles.

I received my Bachelor's degree in Electrical Engineering from MS&T in 1998. I was very active in leadership roles on campus and served both the Quad and TJ as a Resident Assistant for 3 years, and was also involved in Blue Key, Tau Beta Pi, IEEE, and Society of Women Engineers. I was honored to be the St. Pat's Queen and receive the Andrew Sears Extraordinary Leadership Award in 1998.

I am thankful for all the leadership opportunities available during college which helped me develop those skills that have served me in my career and other organizations since. I still love leading, mentoring, coaching and speaking to various groups to this day.

I love to be active, especially outdoors when the weather is nice, and enjoy being back in St. Louis as a lifelong Cardinal fan in addition to being closer to my family. Rolla has become a family tradition for the Moellenhoffs...I am proud to have 3 older brothers who all graduated from S&T with EE degrees (David, EE'86 & MS EE'87, Brian, EE'90, and Craig, EE'91) plus 2 nephews - Kyle, ME'16 and Caleb, ChE'24.
