

Kevin Schwalje

Director at Large

Principal Process Engineer, Brewer Science, Inc.

Kevin joined Brewer Science in 1999. In his current role as Principal Process Engineer, he works to continually improve and develop new chemical process technologies and equipment designs. His responsibilities have included engineering product support and development, and managing personnel and projects. He was also a Brewer assignee in Japan for seven months.

Prior to Brewer Science, Kevin was an engineer at Burns & McDonnell in St. Louis.

Kevin earned a bachelors degree in chemical engineering in 1996, and a masters degree in engineering management in 2019, both at Missouri University of Science and Technology. As a Miner, Kevin was a letterman in track and field and cross country.

Kevin served several years as the treasurer for the local Lambda Chi Alpha Fraternity chapter alumni organization. He has also volunteered at Redeemer Lutheran Church and Project Lead the Way (PLTW). He enjoys coaching various youth recreational teams for soccer and basketball.

Kevin and his wife, Abby, are proud parents of three children. They live in Rolla and enjoy games and family activities together.
