

Marcus Hayer

Area 4 Director

Advisor, ExxonMobil

Marcus is currently an advisor for ExxonMobil in Houston.

Marcus was previously a supervisor for Olin Winchester, dealing with high explosives. He spent 10 years in the oil/chemical business in connection with operations, R&D, and supply chain logistics.

Marcus earned a bachelor's degree in Chemical Engineering from Missouri S&T in 2010.

During his time at Missouri S&T he found passion in iGEM (international genetically engineered machines team), a design team on campus with a mission to better understand how nature can help us with everyday issues. Also while on campus, he worked with borosilicate for bone regrowth and regeneration with the Materials Science Department. Rolla gave so much to him, now he hopes to be able to give back to Rolla.

An active volunteer for the Houston Livestock Show and Rodeo, Marcus is a proponent for western heritage and agricultural education. He has also worked with Young Friends of Ronald McDonald House in the Midwest and Texas.

He grew up in southern Illinois on a cattle, horse, and row crop operation. Horseback riding and raising cattle are his favorite past times and he enjoys rodeos across the globe.
