

Stephen Grelle

Area 5 Director

Senior Associate, Wiss, Janney, Elstner Associates, Inc.

Stephen Grelle is a structural engineer who is frequently involved in a wide variety of repair, rehabilitation, and condition assessment projects. Many of his projects involve repair and maintenance of parking garage waterproofing and structural systems, particularly those involving repair of damaged or deteriorated concrete. Stephen has also worked on a number of projects related to design, evaluation, and testing of facade access equipment. He holds professional engineering (P.E.) licenses in Texas and Louisiana, and a professional structural engineering (S.E.) license in Oklahoma.

While studying at Missouri University of Science and Technology, Stephen was a member of Pi Kappa Alpha. During his graduate studies at S&T, Stephen researched and tested emergency repairs to damaged structural concrete members using fiber-reinforced polymer (FRP) laminates as a research assistant in the High-Bay Structural Laboratory. His research included detailed investigation of the design and evaluation of FRP-to-concrete anchorage systems used in structural repair and rehabilitation.

Stephen currently lives in Dallas, Texas with his wife, Emilie, who is also an S&T alum. He enjoys distance running and has finished a number of marathons, including qualifying for and completing the Boston Marathon in 2018.
